**Updated ICC-ES ESR-1900 Reassures Customers of  
Eagle Roofing Products' Commitment to Quality**

*Eagle Is the First Concrete Tile Manufacturer to Update to  
2009 International Building Code® and 2009 International Residential Code®*

**Rialto, Calif, - June 1, 2011-** Eagle Roofing Products has received the concrete tile roofing industry's first updated ICC-Evaluation Service (ICC-ES) evaluation report (ESR-1900) providing evidence that its Eagle® Standard weight and Eaglelite® lines of concrete roofing tiles comply with the 2009 *International Building Code*® (IBC) and the 2009 *International Residential Code*® (IRC).

Eagle Roofing Products has been in the roofing industry for more than four decades and is one of the nation's leading manufacturers of quality roofing products. ICC-ES is an industry leader in performing technical evaluations for code compliance, providing regulators and construction professionals with clear evidence that products comply with codes and standards.

These ICC-ES Evaluation Reports are used by building officials, architects, contractors, specifiers and designers to ensure the roofing products specified and utilized in construction projects are compliant to current codes and standards. ICC-ES President Mark Johnson adds, "Building departments have a long history of using ICC-ES evaluation reports, and ICC-ES operates as a technical resource for the building departments."

When installed in accordance with the ICC-ES Evaluation Report ESR-1900 on the 2009 I-Codes, Eagle's Standard Weight and Eaglelite® tiles are Class A roof coverings in accordance with IBC Section 1505.2 and IRC Section R902.1. This meets the fire classification requirements in Section 3.6 of the ICC-ES Acceptance Criteria for Clay and Concrete Roof Tiles (AC 180).

ICC-ES Director of Sales Michael Temesvary explains, "Eagle Roofing Products can now provide local jurisdictional authorities with evidence of compliance with the roof classification requirements of the 2009 IBC and IRC, demonstrating their continuous commitment to comply with the latest editions of the I-codes."

ICC-ES thoroughly examined Eagle Roofing's product information, test reports, calculations, quality control methods and other factors to ensure its concrete tile products are code compliant.

"It was a long and rigorous process to achieve approval of our tile products, including having our plants and manufacturing processes thoroughly inspected with quarterly audits as mandated by AC 180 requirements", said Kevin Burlingame, president of Eagle Roofing Products. "To be the first concrete tile manufacturer to receive an updated ICC-ES Evaluation Report demonstrating conformance to the 2009 I-codes, confirms Eagle's commitment to providing our customers with the utmost in product excellence and quality control."

The Eagle Standard Weight and Eaglelite tile products recognized in ICC-ES Evaluation report ESR-1900 are: Capistrano, Malibu, Bel Air, Bel Air Estate, Bel Air Double Eagle, Ponderosa, Ponderosa Estate, Ponderosa Double Eagle and Ponderosa Golden Eagle profiles.

#### **About Eagle Roofing Products**

Eagle Roofing Products, a division of Burlingame Industries, was founded in 1989 with the goal of manufacturing quality concrete roof tile in modern, automated and high-speed plants. From the beginning, Eagle Roofing Products has prided itself on building strong relationships with customers of all sizes by listening and responding to their requests. Eagle Roofing Products is continually expanding its production capacity and its market coverage in order to offer its superior products nationwide. Having earned an AAA rating by the Better Business Bureau, Eagle maintains strong sales and customer service support at the local as well as national level. Eagle is also committed to seeking out trend setting technologies and products that help the environment while helping our customers and their customers. Our green building products and green manufacturing process are a major focus of the company's time and investments. For more information on Eagle Roofing Products, please visit [www.eagleroofting.com](http://www.eagleroofting.com).

#### **About ICC Evaluation Service, LLC (ICC-ES)**

ICC-ES is the United States' leading source of technical information on building products and building technology for code compliance. A nonprofit, public-benefit corporation, ICC-ES performs technical evaluations of building products, components, methods and materials. The evaluation process culminates with the issuance of reports on compliance with the major U.S. building codes, which are available at [www.icc-es.org](http://www.icc-es.org).

ICC-ES is a subsidiary of the International Code Council, a membership association dedicated to building safety and fire prevention that develops the codes used to construct residential and commercial buildings, including homes and schools. Most U.S. cities, counties and states that adopt codes choose the International Codes developed by the International Code Council.
