### **Open Energy Announces Marketing Alliance and Initial Order with Eagle Roofing**

**SOLANA BEACH, Calif., Oct 23, 2006 (BUSINESS WIRE)** -- Open Energy Corporation (OTC BB: OEGY) announced today that it has formed a strategic marketing alliance to distribute SolarSave(R) photovoltaic roofing systems through Eagle Roofing Products (Eagle), one of the nation's leading manufacturers of concrete roof tiles. The deal involves an initial purchase order of SolarSave(R) tiles together with SolarSave(R) balance of system components including inverters, cables and combiner boxes. The initial order will meet the solar requirements for approximately 20 residential homes.

"This strategic collaboration maximizes the advantages of our SolarSave(R) products," stated David Saltman, Open Energy's CEO. "Our PV Tiles match the colors and edge profiles of Eagle's products, resulting in solar power systems that are easily installed and aesthetically superior to competitive products. We believe this alliance represents a significant step forward in the evolution of the building integrated photovoltaic industry."

Seamus Burlingame, COO of Burlingame Industries, parent company of Eagle Roofing Products stated, "The ability to package and ship complete roofing systems to the job site is very important to developers and homeowners. By qualifying and factory training the roofing contractors, we will develop a national network of installers who will add tremendous value to the entire process. The fact that SolarSave(R) Tiles are low voltage, light weight and easy handling greatly facilitates this process."

Eagle plans to display SolarSave(R) Tiles in its showrooms and actively co-market the product at industry trade shows and other promotional events. Open Energy will support the effort with installer training and certification programs. Open Energy backs its PV roofing products with a 25-year limited warranty.

#### ABOUT OPEN ENERGY

Open Energy Corporation (OTC BB: OEGY) focuses on the development and commercialization of renewable energy products and technologies for a wide range of applications including electrical and thermal power production, and water desalination. The Company pursues these objectives through technology innovation, acquisitions and strategic partnerships, and other business strategies. The Company's mission is to enhance life by harnessing the power of the sun.

#### ABOUT EAGLE ROOFING

Eagle Roofing Products is a privately held corporation and one of the leading concrete roof tile manufacturers in the country, with production facilities in Rialto and Stockton, California, Phoenix, Arizona and a plant currently under construction in Sumterville, Florida. Eagle is a division of Burlingame Industries, Inc., a privately held corporation.
