## **Eagle Solar Roof Powered by SolarSave® Integrated Solutions Now Widely Available To Customers Throughout Southwest, Texas, Nevada and Great Plains Regions**

**RIALTO, Calif., Feb. 20, 2008** – Eagle Roofing Products, a division of Burlingame Industries, announced today it is expanding the availability of the Eagle Solar Roof, its comprehensive solar roof solution designed to maintain the aesthetics of a tile roof while generating clean, safe, energy efficient electricity from the sun.

The Eagle Solar Roof powered by SolarSave® Integrated Solutions will now be widely available to customers throughout Texas, the Southwest states of Arizona and New Mexico, as well as the Intermountain territory, which supports homeowners in Nevada and Utah. In addition, Eagle will launch its solar solution to consumers in the Great Plains region, making the product immediately available in Colorado, the Dakotas, Wyoming, Nebraska, Kansas and western Missouri.

“Since announcing the launch of our solar roof solution in the West Coast in December, Eagle has garnered inquiries regarding its availability both from those in the building industry as well as homeowners,” said Jay Banister, Eagle’s National Green Program Manager. “In keeping with our reputation for being highly responsive to the needs of its customers, Eagle is making every effort to expedite the launch of its solar roof solution to customers nationwide.”

According to Banister, the Eagle Solar Roof powered by SolarSave® Integrated Solutions is receiving overwhelming positive acceptance as a viable means of providing abundant, renewable energy production. **The product, which was formally launched in December in California, has already been installed on over 100 homes.** The Eagle Solar Roof is offered through a strategic relationship with Open Energy Corp. a company focused on the development and commercialization of renewable energy products. Unlike solar solutions previously available in the industry, the SolarSave® panels of the Eagle Solar Roof are effectively installed alongside roof tile on the home. Since the panels were designed to perform and be installed as a roofing product rather than a traditional solar panel, their durability is outstanding and warranted for 25

years as a roofing material. The solar panels are lightweight and easily handled so roofing contractors and solar integrators will benefit from improved ease of installation.

Eagle and Open Energy will offer solar training for roofers, electricians and solar integrators in the new regions. In addition, comprehensive training for builder sales staff will be offered. Eagle also will provide all electrical drawings and CAD files needed for the successful design and installation of the solar layout.

The solar panels used in the Eagle Solar Roof are extremely low maintenance, requiring minimal care by homeowners. The resulting installation provides quiet and reliable power generation, reducing pollution and green house gas emissions while delivering safe and secure sustainable energy. The panels used in the Eagle Solar Roof come with a 25-year limited power output warranty and protection against water intrusion. It also comes with 10 years of free Internet-based solar system monitoring for homeowners.

### **About Eagle Roofing Products**

Eagle Roofing Products, a division of Burlingame Industries, was founded in 1989 with the goal of manufacturing quality concrete roof tile in modern, automated and high-speed plants. From the beginning, Eagle Roofing Products has prided itself on building strong relationships with customers of all sizes by listening and responding to their requests. Eagle Roofing Products is continually expanding its production capacity and its market coverage in order to offer its superior products nationwide. Having earned AAA rating by the Better Business Bureau, Eagle maintains strong sales and customer service support at the local as well as national level. Eagle is also committed to seeking out trend setting technologies and products that help the environment while helping our customers and their customers. Our green building products and green manufacturing process are a major focus of the company's time and investments.
