## **Eagle Solar Roof Powered by SolarSave® Integrated Solutions Receives Cool Products Award from PCBC**

**Company is the Sole Roofing Manufacturer to Take Top Honors In Green Category**

**PCBC 2008, SAN FRANCISCO, June 24, 2008** – Eagle Roofing Products, an industry leading manufacturer of energy-efficient, green roof tile solutions announced today that it has been honored with a Cool Products Award for its Solar Roof Powered by SolarSave® Integrated Solutions. The Seventh Annual Cool Products' competition represents the most innovative and appealing products at the Pacific Coast Builder's Show (PCBC), one of the nation's top homebuilding trade shows and conferences. The Eagle Solar Roof powered by SolarSave Integrated Solutions is offered through a strategic relationship between Eagle Roofing Products and Open Energy Corporation, a company focused on the development and commercialization of renewable energy products.

The only roofing manufacturer to win an award, Eagle Roofing Products was selected from 150 product entries in three categories. The Eagle Solar Roof Powered by SolarSave Integrated Solutions was one of five companies honored in the show's new "Green" category. For this seventh consecutive year, the PCBC judges consisted of 5,700 randomly selected PCBC attendees including builders, architects, marketing and real estate professionals. This year's Cool Products Award will be presented at PCBC 2008, June 24 – 27, at the Moscone Center in San Francisco.

"Eagle is very excited to be recognized in the Green category for its innovative solar roof solutions," said Jay Banister, Eagle Roofing Products' National Green Program Manager. "Being selected by the attendees of PCBC is a significant achievement as this recognition comes directly from those in the industry that will implement the product for the benefit of their customers. The award underscores Eagle's dedication to consistently identify new trends in the industry and develop innovative solutions that exceed our customers' expectations."

The Eagle Solar Roof powered by SolarSave Integrated Solutions provides an environmentally sound and beautiful way for homeowners to save on their electricity costs. Since its introduction

in December 2007, the solution has been embraced by both homeowners and builders alike for its appearance and performance. The SolarSave panels are effectively installed alongside roof tile on the home thereby maintaining the aesthetics and performance of a tile roof while generating clean, safe, quiet energy from the sun. Since the SolarSave panels were designed to perform and be installed as a roofing product rather than a traditional solar panel, their durability is outstanding and warranted for 25 years as a roofing material and 25 years as a solar product. The solar panels also are lightweight, easily handled and can be walked on, enabling roofing contractors and solar integrators to benefit from simplified installation.

The Eagle Solar Roof powered by SolarSave Integrated Solutions is part of the company's "Eagle Green" initiative, which also includes ENERGY STAR and Cool Roof Rating Council approved Cool Roof Tile, the Eagle Energy Saving Roof and an environmentally friendly manufacturing process.

### **About the Pacific Coast Builders Conference (PCBC)**

PCBC is one of the nation's top homebuilding trade shows and conferences designed to help builders explore creative solutions and uncover unique strategies for navigating the hurdles of today's homebuilding market. More than 650 exhibitors fill all three halls of San Francisco's Moscone Center with the latest products and services designed to help builders build and sell homes more profitably. Additional information can be found at [www.pcabc.com](http://www.pcabc.com).

### **About Eagle Roofing Products**

Eagle Roofing Products, a division of Burlingame Industries, was founded in 1989 with the goal of manufacturing quality concrete roof tile in modern, automated and high-speed plants. From the beginning, Eagle Roofing Products has prided itself on building strong relationships with customers of all sizes by listening and responding to their requests. Eagle Roofing Products is continually expanding its production capacity and its market coverage in order to offer its superior products nationwide. Having earned AAA rating by the Better Business Bureau, Eagle maintains strong sales and customer service support at the local as well as national level. Eagle is also committed to seeking out trend setting technologies and products that help the environment while helping our customers and their customers. Our green building products and green manufacturing process are a major focus of the company's time and investments. For more information on Eagle Roofing Products, please visit [www.eagleroofting.com](http://www.eagleroofting.com).
